---

### Summary

---

Software Developer with 9 months experience in both front-end and back-end development. Worked on various projects, leveraging expertise to craft user-friendly and responsive UIs, optimize processes, and deliver innovative solutions that meet business objectives.

### Experience

---

#### Software Developer

Apollo Technologies Inc. – Cagayan de Oro City, Misamis Oriental – Aug. 2024 - May 2025

- Designed and developed Vue JS projects with API integrations.
- Developed and maintained Spring Boot and Flask Backend projects.
- Developed a web server with integration of Wifidog authentication protocol and Radiator AAA Radius for public captive portal solutions.
- Ensured data accuracy and security in API development and backend systems.
- Integrated Grafana dashboards to visualize system performance and API metrics for real-time monitoring and analysis
- Created Python scripts to automate database insertion and updates, reducing manual data entry errors and improving efficiency in data handling processes

#### Front End Developer (Internship)

Cagayan de Oro Christian School – Cagayan de Oro City, Misamis Oriental – Feb. 2024 - May 2024

- Developed UI for the School System.
- Integrated APIs necessary for the Frontend development.
